

Advanced Ear, Nose and Throat
Dr. Michael R. Menachof

Nasal Endoscopy Consent Form

There are times when Dr. Menachof needs to perform an in office procedure to be able to correctly diagnose problems of the nose and throat. He accomplishes this through the use of a Nasal Endoscope. A Nasal Endoscope provides direct observation of the nasal passages, larynx, pharynx and other surrounding structures. It is used to help diagnose or detect problems such as nasal polyps, nasal blockage, recurrent sinusitis and any other diseases of the throat or nose. Given the nature of nuances in insurance policies it is your responsibility to contact your insurance company to find out what your financial responsibility for this procedure is. This can be done by calling your insurance provider and requesting information about your coverage on CPT code: 31231, 31575, 31238 or 92511. There are cases that insurance companies look on this procedure as an in office surgery and the payment is applied to the deductible. By signing this paper you are committing to satisfy the financial responsibility established by you and your insurance provider through your policy coverage. Please remember that we are a specialist and Dr. Menachof is able to deliver a high quality of care through the use of highly effective and highly specialized diagnosis tools such as a nasal endoscope. If you have any questions please do not hesitate to ask our front desk staff or Dr. Menachof for more information.
